# Vulnerabilities in Atlassian Products

April 17, 2024 — v1.0

**TLP:CLEAR**

### History:

- 17/04/2024 — v1.0 – Initial publication

## Summary

On April 16, 2024, Atlassian released a security advisory addressing 7 high vulnerabilities in Bamboo Data Center, Confluence Data Center, Jira Software Data Center, and Jira Service Management Data Center [1].

It is recommended updating as soon as possible prioritising internet facing instances.

## Technical Details

All the vulnerabilities, with CVSS scores ranging from 7.5 to 8.2, are caused by vulnerable dependencies used by Atlassian products. If exploited, these vulnerabilities could allow an attacker to expose assets in internal environments susceptible to exploitation, or to cause denial of service condition [1].
